

Story Studio

스토리 스튜디오

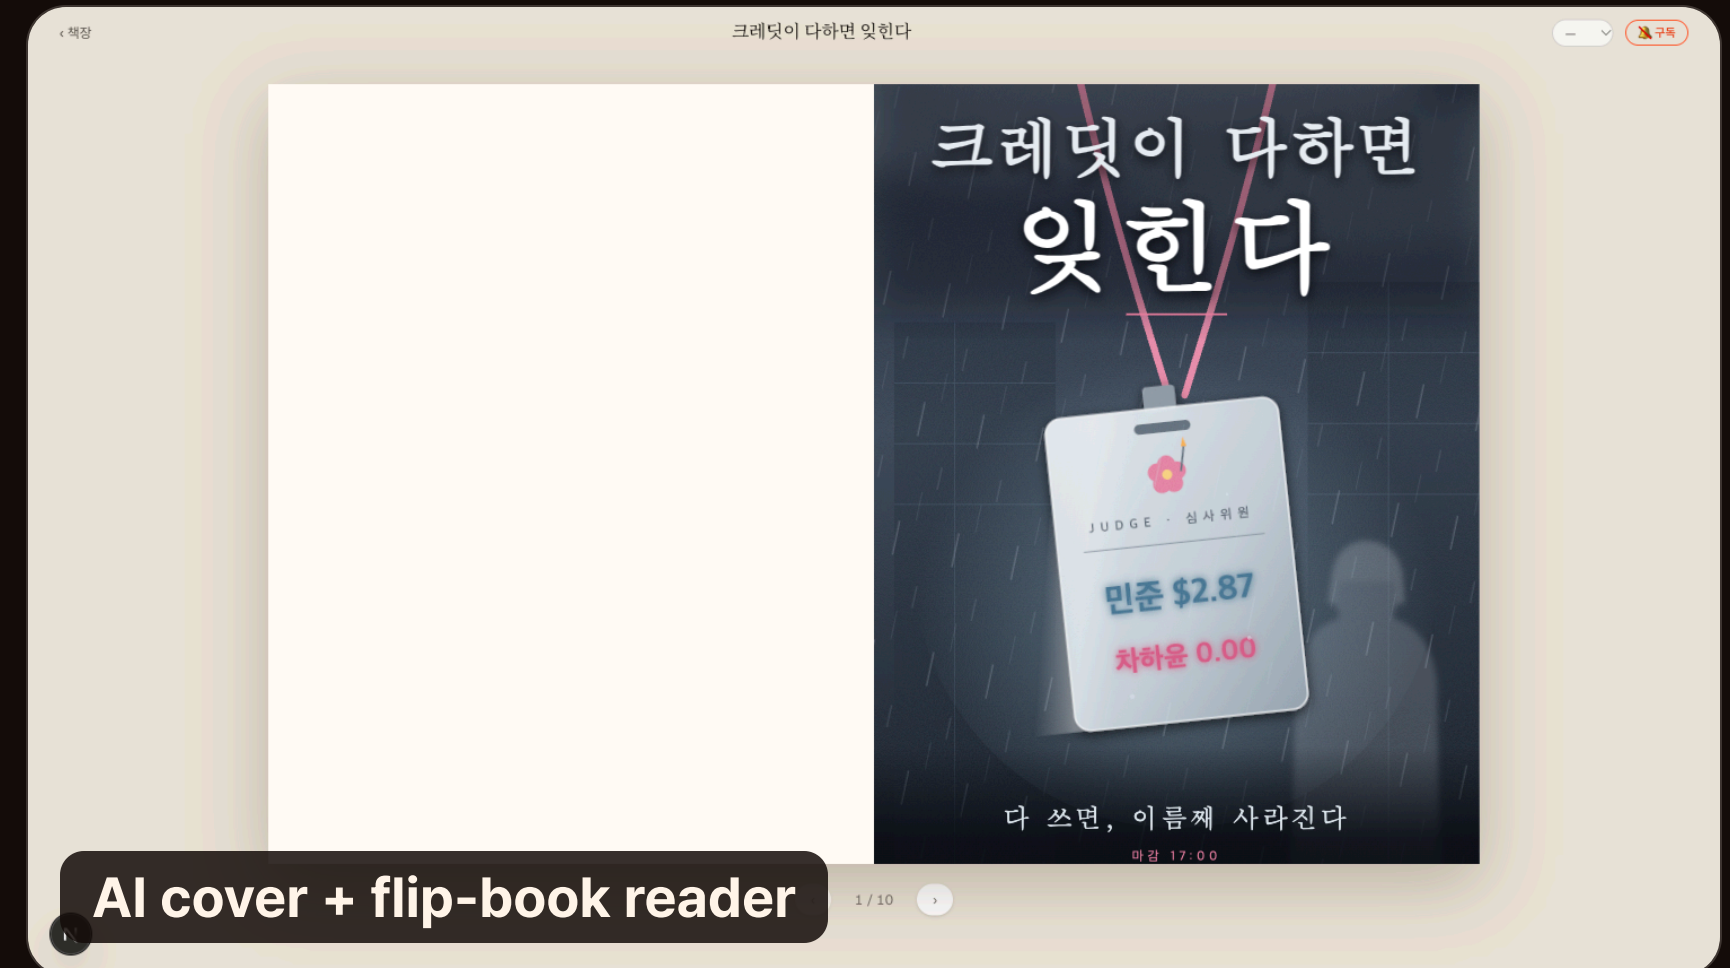

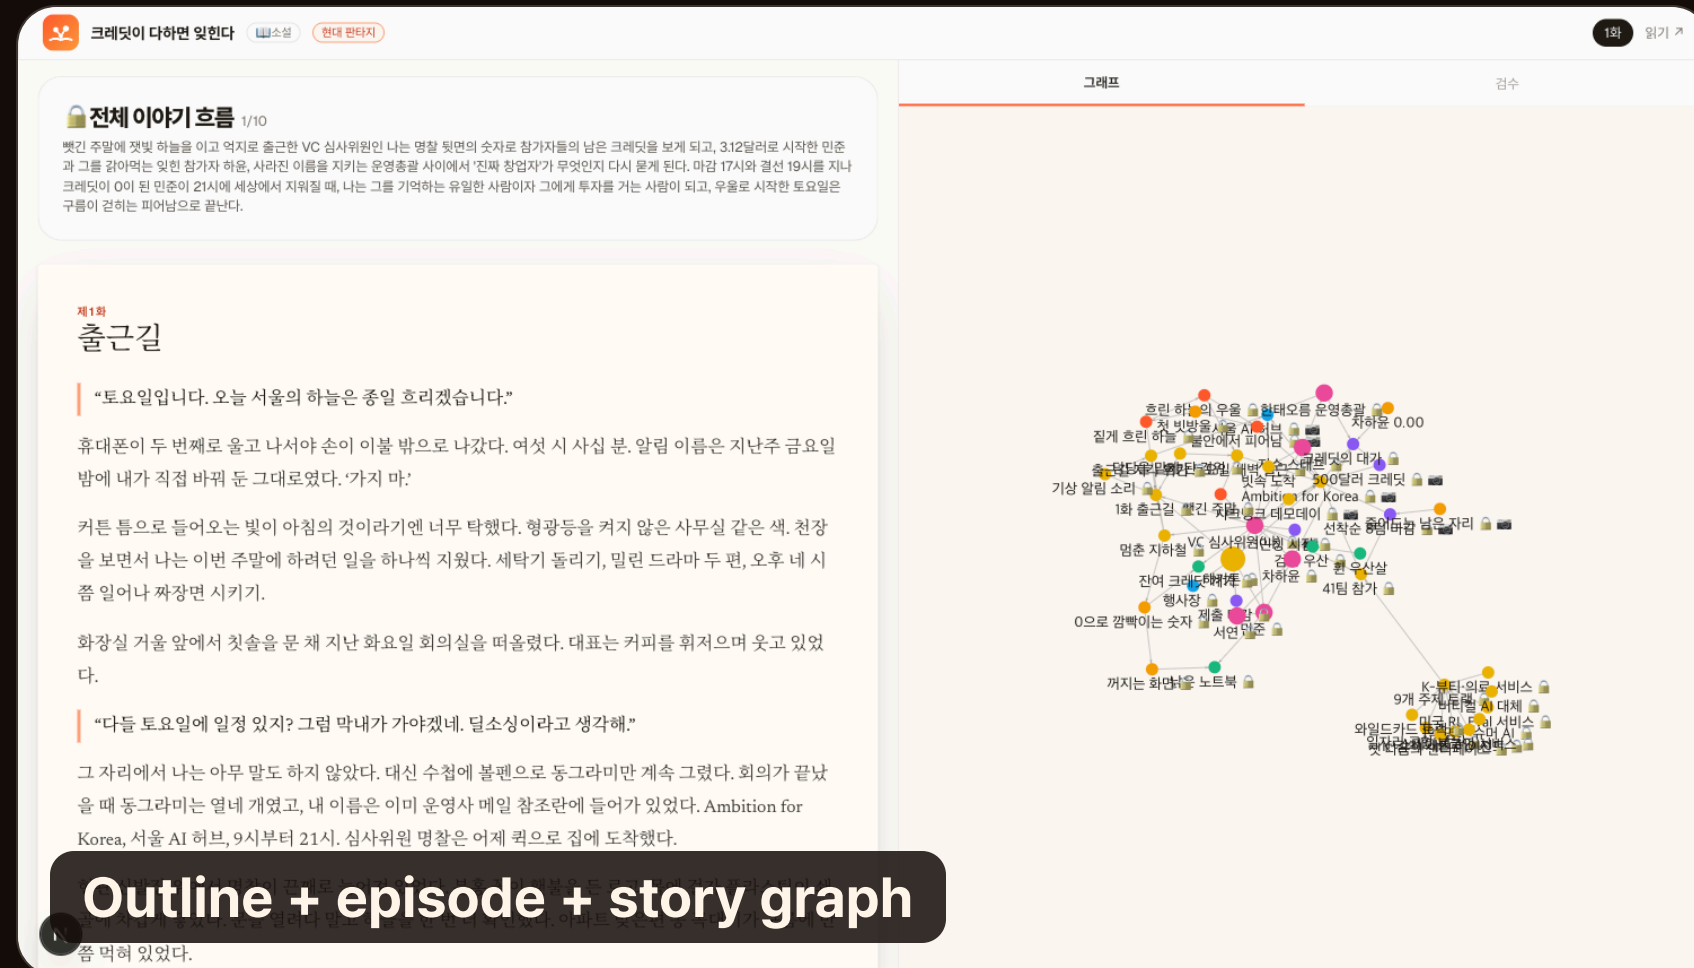

Drop in notes, photos, docs and links. An AI writers' room interviews you, grows a story knowledge graph, and co-writes web novels and drama scripts that never break canon.

TARGET MARKET

- **First:** US & English-speaking web-novel serial writers on Wattpad, Webnovel, Royal Road, Tapas
- **Next:** Japan (Narou, Kakuyomu) and Southeast Asia
- Global writers and IP studios who want K-web-novel pacing

PROBLEM

- **Canon collapse:** after hundreds of daily episodes, characters, rules and foreshadowing drift
- Ideas are scattered across notes, photos and files
- K-web-novel hooks and pacing aren't codified abroad
- AI tools dump text; they don't keep long stories consistent

HOW IT WORKS

Interview → Story graph → 3 planners pitch → Outline →
Writer agents draft → Editor checks canon, Reader predicts hooks →
Publish

CLAUDE INSIDE

Every agent runs on Claude only: Opus, Sonnet, Haiku 5.5. Korean / English UI, works on mobile.
