

HubTrace

Live · hubtrace.vercel.app

A live 3D control tower for parcel networks, with an AI logistics assistant that looks up, plans and acts — only with human approval.

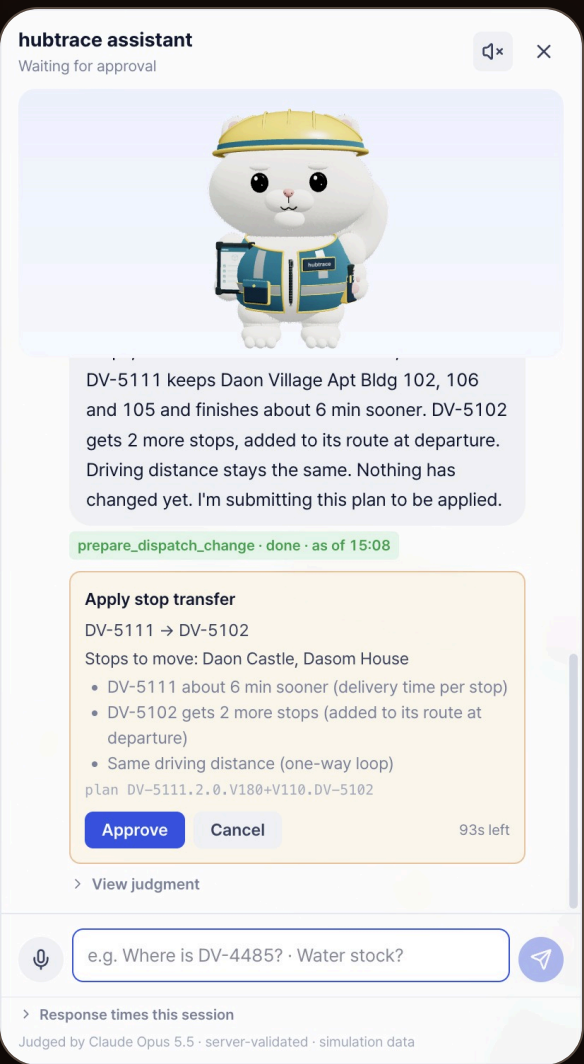

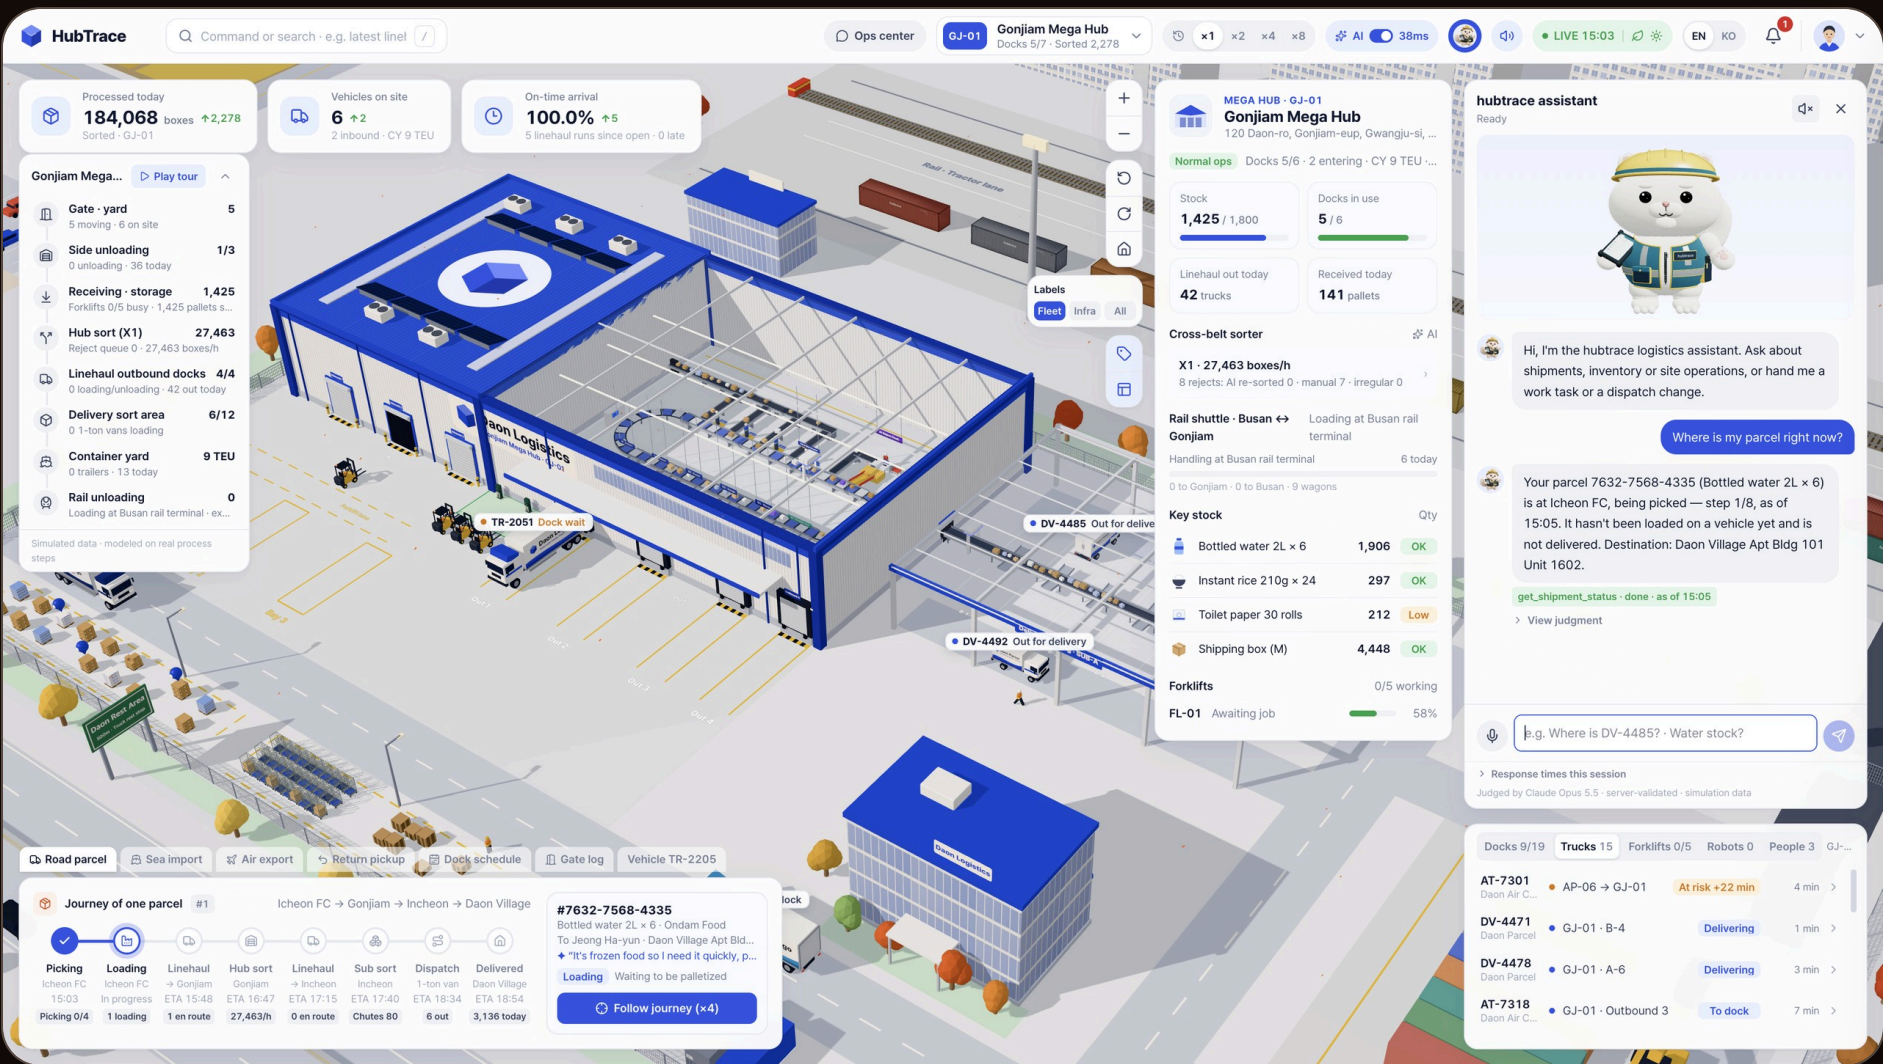

TARGET MARKET

Japan · mid-size 3PLs and parcel carriers running multi-hub networks — their dispatchers and site managers

PROBLEM

Since April 2024, Japan caps truck-driver overtime at 960 hours a year. Same parcel volume, fewer driver hours — yet dispatchers still re-plan by hopping between WMS, TMS and phone calls.

HOW IT WORKS · CLAUDE

Claude Opus 5.5 turns each request into a structured judgment (choice → true/false → score). Our server validates it, runs lookups, and holds every write for one-tap approval.

NEXT 7 DAYS

Japanese UI & voice · real WMS/TMS data feed · pilot with one 3PL hub in Japan
