

FRONTIER LAB MARKET · INSIGHT

AI has read what's written. Next: what's in skilled hands.

Manual, unsystematized industries run on tacit knowledge. We **identify** what is worth it, build it into AX for SMEs, and turn that build-up into **virtual companies** that Frontier Labs **utilize** to train LLMs.

BM The AX we build for SMEs (trial, error and build-up) becomes the virtual company Frontier Labs pay to train on.

Demand, impact and competitive edge are hypotheses until buyer interviews & pilots · Demo data is synthetic · Source: PRD v0.14 · FRD · TRD

One workspace: tacit know-how → virtual company.

S7 Virtual company for LLM training

HOW IT WORKS

- 7 stages: collect → catalog → virtual co.
- Human review + usage rights gate exports
- Built with **Claude Code** agents + tests

NEXT 7 DAYS

- Interview Lab data buyers
- Pilot a real Korean craft topic
- Add AI drafts, human-approved
